Average Annual Compounded Total Returns

ONCORE VARIABLE ANNUITIES

Flex II

*Subaccount Inception is the date the portfolio became part of Variable Account A. Since Inception is the annualized return since that date, however, subaccount returns of 12 months or less are not annualized. Subaccount Inception dates may not correlate to the date the product was introduced.

Total return represents percentage change in net assets of variable accounts, based on the performance of the underlying portfolios and the charges that would have been made during the periods shown (if the contract had been available and not surrendered). It reflects the deduction of a Mortality and Expense Risk and Administration Expense of 1.70 percent and the underlying portfolio's operating expenses. It does not reflect the \$30 annual Contract Administration Charge for contract values less than \$50,000 or charges for optional riders, if applicable; if such charges were reflected, performance quoted would be reduced.

Variable annuities are sold by prospectuses, which contain more complete information including fees and other costs that may apply.

Contact your registered representative or visit www.augustarfinancial.com/fundinfo to obtain current prospectuses. Please read the product and fund prospectuses carefully before you invest or send money. Investors should consider the investment objectives, strategies, risk factors, charges and expenses of the underlying variable portfolios carefully before investing. The fund prospectus contains this and other information about the underlying variable portfolios.

Withdrawals are subject to ordinary income tax and, if taken prior to age 591/2, a 10% federal tax penalty may apply. For tax purposes only, withdrawals will come first from any gain in the contract. Federal and state tax laws in this area are complex and subject to change. Consult your personal tax adviser on all tax matters. Withdrawals may reduce the death benefit, cash surrender value and any living benefit amount.

There is no additional tax-deferral benefit for contracts purchased in an IRA or other tax-qualified plan because these are already afforded tax-deferred status. An annuity should only be purchased in an IRA or qualified plan if the contract owner values some of the other features of the annuity and is willing to incur any additional costs associated with the annuity.

Variable annuities are long-term investment vehicles designed to accumulate money on a tax-deferred basis for retirement purposes. Upon retirement, variable annuities may pay out an income stream of a series of payments or a lump sum. If you die during the accumulation or payout phase, your beneficiary may be eligible to receive any remaining Contract

THIS MATERIAL IS FOR GENERAL USE ONLY WITH THE PUBLIC AND IS NOT INTENDED TO PROVIDE INVESTMENT ADVICE FOR ANY INDIVIDUAL.

Guarantees are based upon the claims-paying ability of AuguStarSM Life Insurance Company. Guarantees do not apply to the investment performance or account value of the underlying variable portfolios. As with any investment, investing in variable portfolios involves risk, including possible loss of principal. Past performance is not a guarantee of future

Product, product features and rider availability vary by state. Issuer not licensed to conduct business and products not distributed in NY.

Some portfolios contain different investments than similarly named retail mutual funds offered by the portfolio manager. Investment results may be higher or lower.

Investment risks include but are not limited to Capitalization Size Risk (Small/Mid): Small and mid cap stocks are often more volatile than large cap stocks smaller companies are often more volatile than larger companies smaller companies generally face higher risks due to their limited product lines, markets and financial resources. **Commodity and Derivative Risk:** Investments in commodities (and related instruments) and derivative instruments such as options, futures, forwards or swaps can be riskier than traditional investments, and may be more volatile. **ETF Risk:** Investments in ETFs bear the share of the ETF's expenses and run the risk that the ETF may not achieve its investment objective. Emerging Market Risk: Emerging markets may be subject to greater volatility because they are concentrated among relatively few companies and within a narrow range of related industries. Fixed Income Risk: Investments in fixed income securities are subject to interest rate risk, the fluctuation of the interest rate, and credit risk, the issuer's ability to make timely payments of interest or principal. The lower the credit rating, the higher the risk of default. Fixed income securities with lower ratings (commonly known as junk bonds) tend to have a higher probability that an issuer will default or fail to meet its payment obligations. Foreign (Non-U.S.) Risk: Non-U.S. securities may be more volatile because of political, regulatory, market and economic uncertainties associated with such securities. Fluctuations in currency exchange rates may negatively affect the value of the investment or reduce returns. These risks are magnified in emerging or developing markets. Index Risk: The Index is a broad-based, unmanaged stock index including reinvestment of dividends and expected directly between the part of exclusions and expected directly between the part of exclusions. returns. These lasks are magnified in enlerging of developing markets. The mask is a bload-based, unmanaged stock index indexinder in enlerging of developing markets. The lask is a bload-based, unmanaged stock index

- # This underlying portfolio began operations prior to becoming part of this contract's Variable Account. Performance data includes the period from the portfolio's inception date through the date it became part of this contract's Variable Account. The performance data was derived by reducing the portfolio's actual performance during the period by the contract charges that would have been imposed had the portfolio been available during that period.
